CASE STUDIES |

■ Client

Deutsches Haus Ho Chi Minh City

■ Services

Interpretation (2017)

■ Overview

Client needed a German-speaking interpreter to help with inspecting the construction site, communicating with German-speaking technician, and accurately relaying the messages to Vietnamese construction workers. Given the highly technical aspect of the project and high-standard requirements from the German investors, we had scrutinised our resources and despatched one of our best interpreters, who was fluent in German, had spent more than a decade living and working in Germany, and had an extensive background in technical-related works. After an extensive two-week working, including overtime, and our interpreter's best efforts, the project was concluded with high satisfaction from the client.
